Professional Summary

Software Development Engineer (Fresher) with a Master's degree in Computer Applications (MCA) and strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Hands-on experience in designing and developing scalable full-stack and distributed applications using Java, Python, JavaScript, React, Node.js, and SQL/NoSQL databases. Passionate about problem-solving, system design, and building customer-centric solutions in agile environments.

Technical Skills

Programming Languages: Java, Python, JavaScript, C++

Core CS: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, Oracle

Cloud & DevOps: AWS (Basics), Azure (Fundamentals), CI/CD Basics

Tools: Git, GitHub, VS Code, Postman, Jira

Concepts: REST APIs, Distributed Systems, Agile SDLC, JWT Authentication, Performance Optimization

Experience

Full Stack Developer Intern — Koharent Global Technologies, Bengaluru

Jul 2025 – Sep 2025

- Analyzed business requirements and converted them into technical modules and RESTful APIs.
- Designed and developed scalable full-stack features using the MERN stack.
- Participated in Agile ceremonies, peer code reviews, debugging, and unit testing.
- Took ownership of features from development to deployment, ensuring performance and quality standards.

Projects

1. JobPortalAI – Resume Parsing & Auto Apply System

React, Node.js, MongoDB, OpenAI API, JWT

- Built an AI-driven system to parse resumes and match candidates with job requirements.
- Designed REST APIs and database schemas to support automated job applications.
- Improved application efficiency through intelligent skill extraction and matching.

2. NammaRide – Real-Time Ride Sharing Application

React, Node.js, Express, MongoDB, Socket.IO

- Implemented real-time ride requests, OTP-based verification, and live updates.
- Designed event-driven architecture to handle concurrent users efficiently.

3. Foodie – Online Food Ordering Platform

MERN Stack, JWT, Payment API

- Developed user authentication, cart management, and online payment integration.
- Ensured secure transactions and scalable backend services.

4. AI Code Review System

React, Node.js, OpenAI API

- Automated code analysis to detect syntax issues and suggest optimizations.

5. LightHub – Smart IoT Automation System

ESP8266, RTC DS3231, LDR, LCD, Blynk

- Automated lighting control using sensors and real-time clock logic.
- Applied embedded system programming and hardware-software integration principles.

6. Blood Bank Management System

Spring Boot, Java, MySQL

- Built secure donor registration, search, and data management functionality.
- Implemented role-based access and validated user inputs.

7. Chatbot Application

Python, Flask, MySQL

- Designed a chatbot with database-driven responses for user queries.
- Improved response accuracy through structured intent handling.

Education

Master of Computer Applications (MCA) — CGPA: 8.6

Community Institute of Management and Studies, Bengaluru

2023–2025

Bachelor of Computer Applications (BCA) — CGPA: 8.3

VidyaVahini First Grade College, Tumkur

2020–2023

Certifications

- EY + Microsoft — AI Skills Passport (2025)
- Deloitte — Cyber Job Simulation (2025)
- Deloitte — Data Analytics Simulation (2025)
- AWS S3 Basics — Coursera (2023)
- Infosys — Web Fundamentals with JavaScript (2023)

Additional Information

Languages: English, Hindi, Kannada

Interests: Cloud Computing, Distributed Systems, AI/ML, DevOps, Problem Solving
